Rogosiin Kidney Care

The Rogosin Institute

The Rogosin Institute has long been recognized as one of the premier centers for the diagnosis and management of kidney disease in the country and recognized for its unique approach to the prevention, detection, and management of chronic and end-stage kidney disease. Rogosin is:

- One of the **ten largest dialysis providers** in the US
- **A pioneer in both transplantation and dialysis** having performed the first hemodialysis in NYC in 1957 and the first living related kidney transplant in NYC in 1962
- A world-class care provider for over 20,000 patients with all stages of chronic kidney disease (CKD)
- Leading the way with its **comprehensive education program for patients with advancing kidney disease (PEAK)** for support and better management
- A specialty care provider dedicated to the **diagnosis and management of autosomal polycystic kidney disease** in its Susan R. Knafel Polycystic Kidney Disease Center
- Conducting basic and clinical research in all aspects of kidney disease including a cutting-edge **Kidney Regenerative Medicine Laboratory**
- **Affiliated with NewYork-Presbyterian**, one of the nation's premier health systems, Rogosin is a key component of NewYork-Presbyterian Hospital's kidney services, **rated #2 nationally in U.S. News & World Report's Best Hospitals list.**
- Nationally recognized for policy development of new health and health care models that include prevention and education

Rogosin Kidney Center

Jack J. Dreyfus Clinic

Since 1955, the clinic has provided pioneering kidney care treatment focused on preventing and slowing the progression of kidney disease. We provide:

- Comprehensive, compassionate care with a multidisciplinary team
- Treatment for patients with all forms of kidney disease, acute or chronic, early or end-stage
- Care and support for patients with the most common inherited kidney disease—polycystic kidney disease (PKD)
- Referral for evaluation to NYP/Weill Cornell Transplant Program
- Pre- and post- kidney transplant care from transplant nephrologists including monitoring of anti-rejection medications

PEAK Program (Program for Education in Advanced Kidney Disease)

Rogosin's PEAK program provides a comprehensive approach for patients with advanced kidney disease to manage their kidney disease and associated conditions and slow the progression of kidney disease with:

- Collaboration with physicians to give you the best possible treatment options
- Care provided by an interdisciplinary team including nurse practitioner, social worker and dietitian
- Education about all treatment options including hands on home dialysis demonstrations
- Nutritional counseling and emotional support

Rogosin Dialysis Centers

NINE DIALYSIS CENTER LOCATIONS IN BROOKLYN, QUEENS, AND MANHATTAN

We tailor our dialysis services to meet your medical needs and lifestyle, and provide:

- All forms of dialysis including in-center hemodialysis, peritoneal dialysis, home hemodialysis, home nocturnal hemodialysis
- Individualized training for all home dialysis programs in all the boroughs
- Education and counseling in food and nutrition by specialized renal dietitians
- Renal social workers for support to patients in all areas of their lives, including adjustment to dialysis, insurance and community resources
